Roy Verley

The Friends of Stevens Creek Trail will host a public forum entitled "Urban Trail connections: Pros, Cons and Information" to be held in the GLC at West Valley Elementary School, 1635 Belleville Way on Friday, March 28th 2014 from 7:00PM to 9:00PM.

After a brief introduction the bulk of the meeting will be used to gather input from the public about the potential for trail connections in Cupertino, Los Altos and Sunnyvale to bridge the gap between the Stevens Creek Trail in Mountain View, which currently ends at Dale/Heatherstone and Cupertino's Trail that is currently being extended from Blackberry Farm north to Stevens Creek Boulevard. "The current feasibility study process seems to have created some confusion in the community about how the trail connections might affect their neighborhoods," said Aaron Grossman, Executive Director of the Friends, "we'd like to do our part to understand the concerns of the neighborhoods and provide relevant information to them."

Founded in 1993, the Friends of Stevens Creek Trail mission is to promote community pride and involvement in the completion, enhancement, and enjoyment of the Stevens Creek Trail and Wildlife Corridor. The Friends is not involved in the design, approval or construction of the trail; that is done by the individual cities.
